

October 25, 2017

To whom it may concern,

Please accept this letter as a recommendation for the structural and civil engineering services of ZCS Engineering, Inc.

ZCS Engineering, Inc. provides the Klamath Falls City Schools with on-call consulting services that are above and beyond our expectations. They are truly partners in our effort to provide our students with a safe and inviting learning environment.

Representatives from ZCS work closely with our school board and our administration to provide the necessary guidance for our construction, maintenance and renovation plans. Their expertise has been invaluable in helping our district stretch our scarce facilities' dollars.

Some of the services ZCS has provided include district-wide technical assistance during school property sales, district-wide building maintenance and repair consultation, and supervision and design support for various facility additions and alteration projects. ZCS also serves as the City Schools' agent for facility procedures and requirements.

ZCS has also saved us significant resources of time and money by supporting our facilities department, so they can more efficiently arrive at the right engineering and maintenance solutions.

Even more valuable are the engineers that make up the team at ZCS. They are top-notch professionals and great people with which to work. They think of all the small details that add up to make a big difference. They understand schools and what is needed for effective learning environments.

This is my unqualified recommendation, based on more than seven years of experience, of ZCS Engineering as a firm that will take good care of your schools, staff, and students

Sincerely,

Paul Hillyer

Superintendent

Klamath Falls City Schools: Where 100% Graduation is the Expectation
