Tom Rinearson, Superintendent

10/25/2017

To Whom it May Concern,

Lincoln County School District has worked with ZCS Engineering on our initial Seismic Grant retrofit application. They, then engineered the Toledo High School gymnasium retrofit project. This project was on a tight time line, we started the project in March and it was complete by August 1 for the start of volleyball camps and daily doubles. The project was on time and on budget. We were very pleased with their work on this project.

Since the Toledo High School project, we have now hired ZCS Engineering for two more Seismic Grant projects. The first being the 1.5 million Seismic Retrofit of Newport High School's gymnasium and the second a 1.5 million Seismic Retrofit of Sam Case Elementary school's classrooms. These projects are set to start on June 15th, 2018.

I highly recommend ZCS Engineering to other school districts for these capital improvement projects. Please call my cell if you have any additional questions.

Sincerely,

Rich Belloni
Director of Support Services
